After reviewing the request and analyzing the documents provided, it has been determined that:

- This is a research study not involving the human being (as defined by the French Research Regulation Authorities), referred to as a "research project outside the Jardé law" (study using data typically collected for the type of care described, no additional patient recall)
- The scientific value of the study is satisfactory
- The protocol used does not raise ethical concerns
- The composition of the research team is satisfactory

For all these reasons, the Ethics Committee of the French Society of Stomatology, Maxillofacial Surgery and Oral Surgery (SFSCMFCO) issues a favorable opinion for this research project.

This opinion in no way exonerates the person in charge of the research project from carrying out any necessary regulatory procedures (approval from the National Commission for Information Technology and Liberties (CNIL), appointment of a Data Protection Officer (DPO), registration of the project on the Health Data Hub, declaration of the study on the clinicaltrials.gov website, etc.) before the start of the study..

The project lead is also required to sign the commitment below:

I, the undersigned: (Name: _____ First name(s): _____ date of birth: _____ title: _____
Professional address: _____ number: _____ Email: _____ Phone _____

As the principal investigator/research project lead, I hereby commit to:

1. Requesting the opinion of the SFSCMFCO Ethics Committee for any protocol modifications made following this opinion
2. Informing the SFSCMFCO Ethics Committee of the study's progress
3. Notifying the SFSCMFCO Ethics Committee of the study's conclusion and submitting the final report and/or resulting article(s)
4. Acknowledging this opinion in the publication(s) and thanking the SFSCMFCO in the publication(s)

Date, location, signature

Approved projects by the Ethics Committee will be recorded in the research directory for stomatology, maxillofacial surgery, and oral surgery, available on the SFSCMFCO website.
